

OMAR HATHAT

Mechanical & Energy Engineer | omarhathat8@gmail.com | +962 79 267 3505 | Portfolio | LinkedIn | Bilingual (English, Arabic)

PROFESSIONAL EXPERIENCE

Engineering Intern | Ministry of Energy and Mineral Resources, JREEEF | Jordan (Feb. 2026 – Present)

- Audited and restructured the industrial energy database by engineering logical chains to resolve 340+ errors, configuring 6 dashboards to analyse sector performance and financial ROI metrics (139M kWh/yr savings, 1.37M tCO2 offset).
- Assembled a master Excel database via Standard SQL and VBA that evaluates 500+ projects to present historical and live metrics into Power BI dashboards to support executive decisions.
- Authored a green building policy brief to quantify a 46% energy demand share and explain JGBG's +20% FAR incentive.
- Published the financial overview for JREEEF's '11 Years of Changing Lives' booklet via Excel, Canva, and NotebookLM, surfacing JD 152.9M in savings, a 4.1x CAGR, and a 3.2-year payback period across a JD 84.2M portfolio.

Data Analyst | BMW, Abu Khader Automotive | Jordan (Oct. 2025 – Jan. 2026)

- Automated analysis operations of remote vehicle data by developing VBA and Python macros via MS Excel to produce 3-sheet data products, effectively reducing manual reporting time by 90%.
- Enabled real-time KPI tracking for 3 corporate departments by configuring interactive Power BI dashboard setups.
- Structured operational workflows into logical frameworks by authoring departmental SOPs, improving efficiency by 15%.

Business Analyst Intern | BACE Partners | Saudi Arabia (June 2022 – Aug. 2022)

- Identified operational outliers and commercial variances by producing 5+ KPI reports via Excel analysis, translating raw market data into polished strategic presentations for senior management.
- Cleaned and validated 2 large-scale regional market datasets to ensure strict corporate reporting integrity and compliance.

EDUCATION

University College London | MSc Engineering with Finance (2024 – 2025)

Queen Mary University of London | BEng Sustainable Energy Engineering (*1st Class Honours*) (2021 – 2024)

SKILLS

Engineering Systems	MATLAB, 2D/3D CAD (Shapr3D, SolidWorks), ANSYS (Fluent, Mechanical), PVSYST
Data & Analytics	Python, SQL, MS Office (Excel, Power BI, PowerPoint), VBA/Macros, Tableau
Finance & Operations	Financial Modelling (DCF, 3-statement), CAPEX/OPEX, KPI Reporting, Project Management

KEY PROJECTS

University College London | *Hydrogen Combustion Thesis (Testing & Validation)* (Jan. 2025 – Sep. 2025)

- Validated mechanical safety for 100% hydrogen assemblies under ultra-lean, high-pressure thermodynamic conditions.
- Refined critical operating parameters by processing complex thermoacoustic measurement data via MATLAB algorithms.

University College London | *Colombian Research Station (Project Management & Logistics)* (Oct. 2024 – Dec. 2024)

- Directed a £265k outbound logistics and procurement plan for a complex new infrastructure facility in Colombia.
- Authored comprehensive risk registers and operational documentation to mitigate severe supply chain shipping delays.

Queen Mary University of London | *Dynamic Wireless Power Transfer (Business Case)* (Jan. 2024 – Apr. 2024)

- Bridged technical infrastructure planning with regional commercial strategy by establishing accurate 5-year plans.
- Proposed a strategic engineering business case to heavily reduce freight logistics emissions by 40,000 tons yearly.

COURSES AND CERTIFICATIONS

RCREEE | PA-CEMP (*in progress*)

JPMorgan Chase | Quantitative Research

McKinsey & Company | Forward Programme

Goldman Sachs | Excel for Financial Modelling
